Instructor: Rahul Bhadani

Spring 2025, VAH

Total Marks = 20

Student's Name: _____

(5 points)

Write down the boolean expression for x_1, x_3, x_4, x_5, x_6 .
For example $x_2 = A \cdot (B + \bar{C})$

Answer:

$$x_1 = B + \bar{C}$$

$$x_4 = C + \bar{D}$$

$$x_3 = B \cdot (C + \bar{D}) \quad x_5 = B \cdot D$$

$$x_6 = A \cdot (B + \bar{C}) + B \cdot (C + \bar{D}) + (B \cdot D)$$

② Convert 1234.125 to binary. (Not IEEE754 floating format)
(5 points)

Answer:

$$1234 =$$

2	1234	
2	617	0
2	308	1
2	154	0
2	77	0
2	38	1
2	19	0
2	9	1
2	4	1
2	2	0
	1	0

$$(1234)_{10} = 1011010010$$

$$0.125 =$$

$$\begin{array}{lcl} 0.125 \times 2 = 0.250 & \rightarrow & 0 \\ 0.250 \times 2 = 0.500 & \rightarrow & 0 \\ 0.500 \times 2 = 1.000 & \rightarrow & 1 \end{array}$$

$$(0.125)_{10} = (0.001)_2$$

Hence

$$(1234.125)_{10} = (1011010010.001)_2$$

③ Convert 85.125 to IEEE 754 floating point binary format (Single precision, i.e. 32 bit) (20 points)

$$(85)_{10} = \begin{array}{r|l|l} 2 & 85 & \\ \hline 2 & 42 & 1 \\ \hline 2 & 21 & 0 \\ \hline 2 & 10 & 1 \\ \hline 2 & 5 & 0 \\ \hline 2 & 2 & 1 \\ \hline & 1 & 0 \end{array} = (1010101)_2$$

$$(0.125)_{10} = (0.001)_2$$

$$\text{Sign} = 0$$

$$85.125 = 1010101.001$$

$$= 1.010101001 \times 2^6$$

$$\text{Biased Exponent} = 127 + 6 = 133$$

$$133 = \underline{10000101}$$

Normalized Mantissa (23 bits)

$$= \underline{010101001} 0000 0000 0000 00$$

Hence

$$85.125 = \underbrace{0}_{1 \text{ bit}} \underbrace{10000101}_{8 \text{ bits}} \underbrace{010101001 0000 0000 0000 00}_{23 \text{ bits}}$$
